LIQUID ENERGY TRADING COMPANY SWISS S.A.

Vinasse-Kali

(Product code LQS-DK25DDG)

Product description

Vinasse-Kali is a byproduct which is coming from the production of yeast and ethanol based on sugar beet molasses.

The basic raw material in the yeast and alcohol production is sugar beet molasses. Following the fermentation a solution with 8 – 10% dry matter is left. This solution is concentrated by evaporation. During the process of evaporation some crystals are formed – these are separated from the vinasses and suspended in water to a pumpable solution.

Basis analysis

Test	Typical result	Unit
Nitrogen (N)	0,8	%
Potassium	19 +/- 3	%
Sulfur	7 +/- 0,5	%

Delivery: in bulk

Storage: the product has to be stored in steel or concrete tanks – allowing the use of a mixer so that the product doesn't settle.

Legislation: Approved and registered according to the Feed Hygiene Regulation (EC) 183/2005

Liability

The information contained herein is based on technical data that Liquid Energy Trading Company Swiss SA (later on called LetCo) believes to be reliable and accurate, but disclaims any warrant or guarantee, express or implied. LetCo reserves the right to change information contained herein without prior notice. Any information included herein taken solely or as a whole, does not suggest in any way the product is of satisfactory quality or is adequate for a particular purpose. The purchasing party is not released from the burden of carrying out his own tests and experiments. Because conditions of use of this product are outside our control, LetCo excludes any legal or other liability for the use of this information or any part of it, whether or not based on LetCos negligence, and therefore LetCo shall not be liable for any damages (special, direct, indirect, consequential damages) relating to the use of this information or the use of the product referred herein, solely or in combination with other products. Consequently all liability on the part of LetCo is excluded. Furthermore, our sales and delivery conditions will apply accordingly.
