## Citrus Annual 2015

Report Categories:
Citrus
Approved By:
Christine Sloop
Prepared By:
Ornella Bettini

## Report Highlights:

Italy's MY 2014/15 (November/October) orange production is expected to drop by 24 percent compared to the previous campaign due to the lack of rain and the Citrus Tristeza Virus (CTV) that has infected approximately 32,000 hectares of orange groves in the provinces of Catania and Siracusa (Sicily). Italy's MY 2014/15 tangerine production is expected to decrease by approximately 15 percent compared to the previous campaign.

## PRODUCTION

Italy's MY 2014/15 (November/October) orange production is expected to drop by 24 percent compared to the previous campaign due to the lack of rain and the Citrus Tristeza Virus (CTV) that has infected approximately 32,000 hectares of orange groves in the provinces of Catania and Siracusa (Sicily). The Tarocco variety is expected to register a 40 percent drop. The quality peaked around March 20 both in terms of sugar content and color. Sicily and Calabria are the main orange-producing areas, accounting for 59 and 22 percent of total production, respectively. Tarocco, Moro, Sanguinello, Naveline, and Valencia are the chief orange varieties grown in Italy. Moreover, Ippolito and Meli varieties are gaining popularity.

## CONSUMPTION

Most oranges are consumed fresh. Blood varieties (Tarocco, Moro, and Sanguinello) are used mainly for fresh consumption. Late varieties (Ovale and Valencia) are destined to both fresh market and processing industry.

## TRADE

Italy's MY 2013/14 orange imports decreased by 30 percent (155,642 MT) compared to previous year, mainly because of reduced volumes from Spain ( -33 percent), the leading supplier to the Italian orange
market, accounting for approximately 62 percent of total imports. In MY 2013/14, Italy exported 117,891 MT of oranges, mainly to Germany ( 35,469 MT), Switzerland (17,309 MT), Austria ( 12,968 MT), and France ( 10,787 MT).

## Orange Juice

Table 2: Production and Processing (MT)

| Orange Juice | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ |
| :--- | :---: | :---: | :---: |
|  | Estimates <br> $\mathbf{2 0 1 2 / 2 0 1 3}$ | Estimates <br> $\mathbf{2 0 1 3 / 2 0 1 4}$ | Forecast <br> $\mathbf{2 0 1 4 / 2 0 1 5}$ |
|  | Post Data | Post Data | Post Data |
| Delivered to Processors | 309,000 | 320,000 | 308,000 |
| Production | 21,630 | 22,400 | 21,560 |

Sources: Italian industry

According to latest estimates, Italy is forecast to process approximately 308,000 MT of oranges in MY $2014 / 15$ to produce $21,560 \mathrm{MT}$ of concentrate. The total volume of oranges channeled to processing depends on crop quality and quantity of oranges destined for the fresh market, both domestic and foreign.

## Tangerines

Table 3: Production, Supply, and Demand (MT)

[^0]
## PRODUCTION

Italy's tangerine production consists of over 80 percent seedless clementines and nearly 20 percent mandarins. Italy's MY 2014/15 tangerine production is expected to decrease by approximately 15 percent compared to the previous campaign. Italy's MY 2014/15 (November/October) clementine production is forecast to decrease by approximately 19 percent (540,000 MT 668,000 MT in 2013/14), while mandarin production is expected to increase by 9 percent ( $132,000 \mathrm{MT}$ compared to $121,000 \mathrm{MT}$ in 2013/14). Calabria, Sicily, and Apulia are the main tangerine-producing areas, accounting for 50, 23, and 14 percent of total production, respectively. Comune or Oroval and Monreal are the leading clementine varieties grown in Italy. Avana and Tardivo di Ciaculli are the main mandarin varieties.

## CONSUMPTION

Most tangerines are consumed fresh. Italians consume large quantities of clementines and mandarins during winter holidays when the bulk of production hits the market.

## TRADE

Italy's MY 2013/14 tangerine imports reached 80,288 MT, a decrease of approximately 12 percent from MY 2012/13, mainly due to a reduced supply from Spain (-14 percent), the leading supplier to the Italian tangerine market, representing 85 percent of total imports. In MY 2013/14, Italy exported approximately 76,991 MT of tangerines, 14 percent less than previous year, mainly because of reduced volumes to Poland (-42 percent) and Romania (-27 percent), the leading destinations for Italian tangerines, accounting for 14 and 10 percent of total exports, respectively.

## Lemons

Table 4: Production, Supply, and Demand (MT)

## PRODUCTION

Italy's MY 2014/15 (November/October) lemon production is expected to slightly decrease by 2 percent. Quality is expected to be good. Sicily produces more than 86 percent of Italy's lemons. Femminello Commune (F. Zagara Bianca, F.Siracusano, F. S.Teresa), Monachello, and Interdonato are the main lemon varieties grown in Italy.

## CONSUMPTION

Italy's lemon production is mostly destined for the fresh market.

## TRADE

Italy's MY 2013/14 lemon imports reached 91,270 MT, mostly from Spain and Argentina, accounting for 55 and 21 percent of total imports, respectively. In MY 2013/14, Italy exported 44,062 MT of lemons, an increase of 9 percent compared to previous year mainly thanks to increased volumes to Germany ( +12 percent), the leading supplier to the Italian lemon market, accounting for 35 percent of total imports.

## Grapefruits

Table 5: Production, Supply, and Demand (MT)

Sources: Italian industry; ISTAT; GTA

## PRODUCTION

Italy's MY 2014/15 (November/October) grapefruit production is forecast to decrease by 6.7 percent.

## TRADE

Italy's MY 2013/14 grapefruit imports reached 28,992 MT, mainly from South Africa (9,948 MT), Turkey (4,981 MT), Israel (4,562 MT), and Cyprus (3,555 MT). In MY 2013/14, Italy exported 3,015 MT of grapefruits, mainly to Slovenia, the Netherlands, Croatia, and France.
